

WHAT DO PAST INTERNS HAVE TO SAY?

“NuWay-K&H Cooperative has made a major impact on me and my agronomy knowledge. From the in-field experience you get with the Agronomy Account managers, the behind-the-scenes management from the Precision Ag Specialists, and the networking opportunities with major agronomy manufactures, NuWay-K&H provides many opportunities for their interns to broaden their knowledge. From my experience, NuWay-K&H helps to tailor their intern program to help cover specific topics the interns may be interested in learning about, whether it be sales experience or just overall agronomic knowledge. The opportunities don't stop at internships. After my internship, I was able to keep in touch with them through my last year of college and was offered a full-time position with them the following spring. If you are looking for a summer internship and want to expand your development on your agronomic knowledge and professional skills, I would highly recommend taking the time to look into what they have to offer.”

– DERREK RUSSENBERGER, INTERN 2021

“My internships with NuWay-K&H Cooperative were monumental in helping to foster the connection between what I was taught in college and the real world. To this day, I still use the data analyzation techniques I learned while being a Precision Ag intern.”

– ALLY RINGEISEN, INTERN 2016-2020
